

METAL FINDING

MetalliScanner™ MT 6

Electronic Metal Detector

Locate embedded metal before your drill bit or saw blade does. This powerful dedicated metal scanning tool can locate metal up to 15 cm deep in solid concrete.

MetalliScanner™ MT 6 locates both ferrous and non-ferrous metal up to 15 cm deep in concrete and other non-metallic surfaces. It also differentiates between ferrous and non-ferrous metal targets and indicates the target depth in inches and centimeters.

MT 6 indicates when you are approaching a metal object with a large plus (+) sign on the display. When the plus becomes a minus (-), you have crossed over the target and are now moving away.

Use MetalliScanner™ MT 6 to find or avoid rebar, cables, pipe, nails in reclaimed wood, nails/tacks in studs behind lath & plaster walls, electrical boxes and conduit, and more.

- Automatically differentiates between magnetic metal (such as rebar) and non-magnetic metal (such as copper pipe)
- Shows the depth of metal from the surface in both inches and centimeters
- Easy-to-read LCD screen pinpoints the location of metal objects to the nearest 13 mm and depth to the nearest inch 25 mm
- Helps map out the grid of metal through any nonmetallic construction material, including concrete, tile, and marble

Scan for Metal

SPECIFICATIONS

Dimensions	227 mm H x 98 mm W x 57 mm D
Weight	260 g without battery
Battery Type	9V alkaline (not included)
Position Accuracy	Centre of #4 (13 mm) rebar or 13 mm copper pipe at a minimum grid spacing of 152 mm typically within 13 mm
Depth*	Up to 152 mm ± 25 mm
Operating Temperature	-7° to 41°C
Storage Temperature	-29° to 66°C
Humidity	5-90% RH (non-condensing)
Water Resistance	Splash and water resistant, not waterproof
